BM P82 PROFESSIONAL ETHICS PRACTICE

The course should cover the following topics by way of Seminars, Expert Lectures and Assignments:

1. Engineering Ethics – Moral issues, Ethical theories and their uses
2. Engineering as Experimentation – Code of Ethics
3. Engineer's responsibility for safety
4. Responsibilities and rights
5. Global issues of engineering ethics

BM P83 COMPREHENSIVE VIVA-VOCE

The student will be tested for his understanding of the basic principles of the core engineering subjects. The internal assessment for a total of 50 marks will be made by a committee comprising of the faculty members of the department. The committee will conduct a written examination (objective type and short questions from all the core subjects) followed by a viva voce examination. The external university examination, which carries a total of 50 marks, will be a viva voce examination conducted by a committee of one external examiner and one internal examiner appointed by the university.

BM PW8 PROJECT WORK (PHASE II)

Extension and completion of project work started in the previous semester. On completion of the project work, each student has to prepare a project report and submit the same to the department.

In the Phase II, the project work and the report will be evaluated by the internal assessment committee for a total of 50 marks. The external university examination, which carries a total of 100 marks, will have report evaluation and viva voce examination conducted by a committee of one external examiner and one internal examiner appointed by the University.

SYLLABUS

EE T82 PROFESSIONAL ETHICAL PRACTICE

Objective: To teach the moral issues, ethical theories and global issues of engineering ethics for the students.

Outcome: The graduates will be strong and aware of ethical values and they will behave in such a way to make this world as a disciplined society.

The course should cover the following topics by way of Seminars, Expert Lectures and assignments.

Engineering Ethics— Moral issues, Ethical theories and their uses
Engineering as Experimentation—
Code of Ethics
Engineer's responsibility for safety
Responsibilities and rights
Global issues of engineering ethics

EE PW8 PROJECT WORK PHASE – II

The objective of the projects is to enable the students to work in convenient group of not more than four members in a group on a project involving analytical, experimental, design combination of these related to one or more areas of Electrical & Electronics Engineering. Each project shall have a guide who is member of faculty of Electrical & Electronics Engineering.

Twelve periods per week is allotted for the phase-II of the project work. Each group of students should complete the project and prepare a report covering literature survey, problem statement methodology, results and conclusions. The guide and departmental committees shall evaluate the student's work for 50 marks based on one seminar and one internal viva-voce. The student shall take up the viva-voce before a committee comprising of an external and an internal examiner, which evaluates the students work for 100 marks.

EE P81 COMPREHENSIVE VIVA VOICE

A departmental committee for 100 marks for internal assessment evaluates the students on all areas of Electrical & Electronics Engineering. They also shall be examined by a panel of examiners (An internal examiner and an external) on all areas of Electrical & Electronics Engineering at the end of 8th semester.
